

Circle Of Sound & The Global Harmonisation Ceremony

by Daniel Brower

The sound of a crystal singing bowl is a very special sound. The vibration of the pure sound emanating from the crystal bowl travels across the room or the space to penetrate one's body like few instruments can. When several crystal bowls play together the sounds and vibrations are increased at an exponential degree, and likewise, their penetration into the physical body is increased and rattles our bones and cellular structure completely. When a set of seven crystal bowls tuned to the seven notes of the musical scale are played together, a cacophony of sounds and vibrations is generated that rattles the bones and structure of the whole of Mother Earth!

Such a set of seven crystal bowls is what we call the Circle of Sound. And a very special sound it is indeed! When the bowls are played consciously and with particular intention our cellular system gets 'shook up' in a particular way and eventually settles down and balances into a restructured pattern in alignment with the intentions expressed and sounded. Likewise the vibrations and roots of our Mother Earth are likely to get changed accordingly in alignment with the intentions and thoughts being held while such a collection of instruments is being played. In fact, this is the idea behind the Global Harmonization Ceremony sponsored by Circle of Sound, www.circleofsound.org. Even more, the concept is to gather together as many crystal singing bowls and sets of crystal singing bowls as possible around the planet to be played every Equinox and every Solstice, Circles of Sound with as many people as possible united around the circles and concentrating on the same intentions together: Harmony, Acceptance, Unity, Joy and Compassion among all beings of the planet. The Global Harmonization Ceremony began on the September Equinox in 2005, and we have been sharing them every season since.

With every ceremony more and more people are finding out about this project and are 'Joining the Circle and Sharing the Sound', the motto of Circle of Sound. Our family of Circle of Sound now stretches around the planet, from Russia to Tierra del Fuego in Argentina, from Australia to the northwest corner of the USA, from Egypt to the UK and many places in between. Just imagine the effect on the mass consciousness of humanity that results from the power

of the united consciousness of so many people being amplified by the power of the sound of so many crystal singing bowls. Throw in the sounds of human voices and didgeridoos joining the circles and the sounds around the world, and the effect increases even more. 'Imagine all the People' joining in the Circle of Sound and changing all the world!

This is the vision I have had for the last four years after getting the idea for such an on-going ceremony from Don Hugo Jaime, a descendent of the Comechingone Indians of Argentina back in 2003. I had been guided to meet him at his home in the middle of Argentina near Capilla del Monte in Córdoba Province, a powerful energy spot known for a lot of extraterrestrial and intraterrestrial activities. This was within a year of discovering the power of such a sound and establishing the Circle of Sound on Vashon Island near Seattle, Washington, USA. I found Don Hugo Jaime at home, on some sacred ceremonial lands of the Comechingones, and played my one little travel companion crystal bowl for him with the intention of balancing the energies of the Heavenly Father with those of the Earthly Mother. After he listened and felt the power of the sound of just one bowl, he gave me the original suggestion to travel to six other special sites around the world and play my bowl with the same intention. He spoke the names and locations of the other sites, which I wrote down to remember, because I had not heard of any of them, except for Shamballah in Tibet which rang a memory bell from far away. As we walked for a while afterwards I asked him what might happen if we could arrange to have a crystal bowl played at all seven locations (the seventh spot being a mountain nearby) at the same time. He pondered the question awhile as we walked on, then responded that it might change the consciousness of humanity!

And so began this mission to arrange for not just one bowl, but a set of crystal bowls to be arranged and a family of Circle of Sound to be established at all these seven spots. It has developed into an amazing and wonderful adventure that has taken me to four different continents and many more countries, shown me some of Mother Earth's most magnificent sights and introduced me to many beautiful and powerful people and cultures, all of

whom have embraced the idea of the Harmonization Ceremony whole-heartedly and are now part of the Circle of Sound family. With the help of the Divine Order and some generous friends I have managed to deliver a set of the crystal singing bowls to Peru, Argentina, Russia, France and Mexico thus far, and by the time you are reading this article we will have also delivered a set to a group in Egypt who already understand the concept of our ceremony and is waiting to be the caretakers of the bowls there. That will leave just the seventh site to arrange, Shamballah in Tibet. We intend to arrange this by the September Equinox Harmonization Ceremony and then have all seven primary sites playing.

Delivering the bowls has been fairly easy; just a matter of arranging payment, shipping and passing through customs. Well, this last step has been a challenge in each country, yet where there is a will there is a way; and we do have a will here, a strong one! The more interesting part of the journey has been to find the people who will form the Circle of Sound and actually play the bowls in the ceremony. Interesting, indeed, because I knew nobody in any of these countries at the start of the project. However Divine Order has been at work at each step along the way, synchronicity has clicked like the gears of a smooth running machine and miracles and blessings everywhere have made the journey a Joy ride in the truest sense of the word! One e-mail has led to another, which has led to a connection, which has led to a new friend who has opened one door, which has revealed the path to new family members. I now count as friends and family people who have been on a spiritual path for decades and those who have just awakened, sometimes by the bowls themselves. Believers and non-believers, because there is really nothing here to believe in. No religion. No philosophy. Our tools are sound and thought. The same tools used 'In the beginning ...' And this has proved to be easy enough for people to grasp and to be willing to participate in.

As I look over the 'CONTACTS' page of our web site I see that we now have regular participants who share the Global Harmonization Ceremony in Argentina, Peru, Mexico, Spain, France, Denmark, Brasil, Chile, Holland, Norway, Germany, Belgium, Italy, Switzerland, England, USA, Hawaii, Australia and Uruguay. And the list of participants grows each season as more people find about our ceremony, mostly by word of mouth. And now that our family is well established, we are all committed to share the ceremony for the next few generations, until we have just as firmly established Peace and Harmony on the planet!

There has been one more interesting and rewarding aspect to the development of this project: finding just the right spot for the ceremony at the seven primary sites. When Don Hugo Jaime first gave me the locations, he mentioned places like Msi Tli Tlan in Peru, Asagar in Russia, Shamballah in Tibet, Tula in Mexico, around the Great Pyramid in Egypt, somewhere in the Pyrenees Mountains in France and around the corner from us, Erks in Argentina. I had heard stories about Erks during my earlier visits to Argentina, reportedly an underground city, or a city inside the Uritorco Mountain, where there are extra and intraterrestrial activities! However the only other places that sounded familiar were the Great Pyramid and Shamballah, which rang that distant bell, or was it the sound of a crystal bowl! When I went to search on the internet for information about the other sites, the only one that popped up with news was Tula, Mexico, the former capital of the ancient Toltec civilization. Shamballah has many references to a magical and mystical place somewhere in the Himalayas, yet mostly legends and stories. The other sites drew blanks; nothing on file! This confounded me, because I had decided that this project deserved looking into as a possible path to take at this point in my life. Like most of us, I felt like doing something positive that can make a difference in the world. I want my children and grandchildren to have a chance to experience a world of Peace, like most of us. Yet I couldn't get the project off

the ground if I did not know where to start. So on my next trip to Argentina in early 2004 I went to visit Don Hugo Jaime again and explained that I had not been able to find any information about these places on any map. Where can I find them?

I still remember the wise grin that spread across his lips as he replied, "You will not find them on any map. They are not to be found on the Earth. They are all cities INSIDE the Earth!"

I remember just as well the chill that I felt all through my body as I realized that this project was bigger than I thought, and had a much 'deeper' meaning. Further discussions with Don Hugo Jaime that day and since then on several occasions have revealed that we are working with seven, not all, just seven of the locations around and inside the planet where there reportedly exist groups of beings who live and carry on work for the benefit of Mother Earth. They may be of another dimension or frequency, yet they are as much a part of this planet as you and I. Most of us cannot see or feel them. And many of us have never even considered the possibility of their existence. Like me before this project. Sure, I had heard stories of an underground city, Telos, at Mount Shasta in California. Likewise while traveling around Lake Titicaca in Peru I heard tales of a crystal city deep inside the waters. Yet I never gave it much thought or credence, like most of us.

Yet sure enough, here in my life appears a project dealing with such a possibility! And just as surely in each of the primary places that I have visited to deliver a set of crystal bowls and to establish a Circle of Sound, when I get around to mentioning that the particular site for the ceremony needs to be in the vicinity of an 'underground city', the response has been something like, "Oh, then we need to go over there and have the ceremony, because our legends say that there is such a city". Each of these places seems to have their own stories and tales of intraterrestrial activities. So I have become a sort of believer by osmosis! Or let us just say that, although I have still had no personal encounter, vision or experience with such things, I am convinced that there is much that I do not comprehend, and I am willing to concede the possibility of the existence of things that I cannot see, like these beings.

If such beings do exist, they are part of our Earth family. They have a right to be here and a role to play in the evolution of our planet and our consciousness, so we include them in the intention of our Global Harmonisation Ceremony as we say: "Among all beings of the planet". The 'deeper' meaning of our ceremony is to establish a Circle of Sound within, a contact, a line of communication with our internal Brothers and Sisters so that we may all at last work together to raise the vibration of the Whole.

We seek Harmony with All beings.

We seek Acceptance of All beings.

We seek Unity with All beings.

We seek Joy for All beings.

We seek Compassion for All beings.

And we invite everyone to join us in this ceremony, in this work to change the world and to manifest the Peace on Earth, Goodwill towards All that the Angels have been singing about for thousands of years. It IS possible. In fact the changes ARE happening. And ALL of us are part of it, part of the All That Is. So let us make our sacred and joyful sounds and send them into the Uni-Verse, the One Song. You are welcome to "Join the Circle and Share the Sounds!!!"
